

# Archangel Metatron

Archangels are the highest-ranking angels in heaven. They are given the most important responsibilities, and they do their work both in the heavenly dimension and on the physical plain. Jennifer Lynch continues our series with a look at Archangel Metatron

Archangel Metatron is associated with sacred geometry and also with the activation of our 12th strand DNA. Many of the things we see in our world now are illusionary.

One of these is the feeling that we can achieve happiness with things outside of ourselves. In geometric terms Metatron is complete as in (Metatron's cube) there is no need for anything from the outside. There is only 'to be,' which in simple terms creates a "spiral of light." Human beings will enter the spiral when they learn to let go of their ego, a need to identify with roles, or possessions. This allows us to be more at-one with who we really are.

The essential Metatronic pattern is the 3D form "The Flower of Life" which I personally refer to as the Mystic Rose. This flower brings focus, balance and harmony through the heart chakra and also brings all the other chakras into alignment. The colours of Metatron are pink and green with blue stripes.

Metatron's cube has often been drawn around a person to protect them from dark energies. It is good to visualise for protection along with other sacred geometry symbols. Putting yourself inside a crystal whilst meditating can have a similar effect. When we are balanced, we are ready to manifest.

Call in Archangel Metatron for inner transformation, alignment, cosmic ordering and ascension. Sometimes he is called to watch over Archangels Gabriel and Samael in their work helping souls on the journey from the earth plain.

Crystals which are associated with this angel are:

*Amethyst* for perception.

*Angelite* to connect to the wisdom of the angels.

*Sapphire* for cleansing, illumination and purity.
